DetailsApplyAmgen is seeking a Director of Information Systems (IS) Operations and Project Delivery to be based at our corporate campus in Thousand Oaks, CA. The Director will report to the VP, Chief Information Officer.The Director of Information Systems Operations and Project Delivery will develop and implement an effective technology project management approach across the IS/GBS (Global Business Systems) Technology groups that delivers greater business value, speed, agility and cost efficiencies. Initially, the Director will lead the Project Delivery workstream under Amgen's "Maximize IS Value" initiative to establish the best practices for delivering these technology projects. Once these best-practices have been established, the Director will transition to become the business owner for maintaining and improving these best practices.Additionally, the Director will drive the transformation to equip Project Managers (PMs) to better identify and execute portions of our portfolio through product release mindset. Utilizing concepts such as minimal viable product releases iterations (i.e. Pivotal labs), the Director will work cross functionally with ISLT leadership to ensure alignment on global release strategies. Further, the Director will establish and drive adoption of key IS operations' play book, processes and constructs surrounding IS/GBS operating model.Key Responsibilities for the Director will include:Lead Project Delivery workstream as part of Maximize IS Value initiative:Achieve level 3 maturity as defined by Project Management Institute (PMI) in programs, traditional projects and project form of agile executionDevelops advanced agile frameworks (scrum, SAFe, DevOps) to deliver with greater agility and speedIdentifies the required competencies and resourcing to effectively deliver technology projectsDevelops proposals and options for project delivery as part of Maximize IS Value initiativeFacilitates Project Managers, Quality, Finance and other stakeholders to evolve project approachesEngages with business and technology leaders, project team members to ensure new approaches are fit-for-purpose and meet stakeholder needsCollaborates and coordinates with Maximize IS Value initiative leads and workstream leads to ensure the future state resourcing, organization and talent needs for project delivery are incorporated into overall solution designAs the Project Delivery Business Owner:Leads the change in how teams deliver projects across all IS/GBS techEmbeds and sustains these project management best-practices across IS/GBS techEstablishes performance metrics to measure and improve how project delivery.Monitors and continuously improves project management best practices.As the Operating Model Business Owner:Leads the change in how teams processes and technology as well as defined across IS/GBS techEstablishes performance reviews to evolve best practices across IS/GBS techEstablishes performance
